WEBER PIANOS.

The unparalleled success of these instruments is due to the limpid purity and warm and sympathetic quality of their tone. Recognizing that until his time the development of the Piano had been in the direction of mechanism, the manufacturer applied himself to perfecting the tone, which he improved remarkably, obtaining a more melodious and musical quality, and also to a degree before unattained that sympathetic sensibility which renders it so indispensable to singers because of its sustaining and harmonizing consonance with the voice.

"Pale, Poor, Puny and Pitiful."

Considering all the ills that reach little children, it is a wonder that any of the poor little youngsters live to grow up.

There are children who are truly objects of pity. They seem almost bloodless. Their cheeks are thin and pinched; their eyes are hollow; and their skin is tightly drawn over their foreheads. There is nothing hearty about them. They do not enjoy their lives. They are suffering from the debility that leads to marasmus. Poor things!

Do a good deed for the pale, poor puny, pallid child. Would another a bottle of Brown's Iron Bitters. There is life even for the most delicate, the most debilitated, for the child almost given up for dead. Iron in the blood is what the child needs to bring it up. The little digestive apparatus will recover. The pale cheeks will fill out. The weary gaze of the child will be exchanged for the merry giggle of infantile gladness.
